LUCAS **GISMONDI**

Toronto, Ontario | 647-237-8912 | www.lucasg.dev

Education

Honours Bachelor of Science: Computer Science Specialist | **Graduate 2021**
University of Toronto | **Toronto, Ontario**
- **Coursework**: Algorithm Design & Analysis, Operating Systems, Algorithms & Data Structures, Human & Computer Interaction, Engineering Large Software Systems, Software Testing & Verification, Natural Language Processing

Experience

Lazer Technologies | www.lazertechnologies.com | Software Agency | **Toronto, Ontario**
Senior Software Engineering Consultant | **01/2023 - Present**
- Providing Software Engineering Consultant services across many stacks. Notable clients include Google, Humi, Argo, Electric Capital.

Unmet | www.unmet.ca | Software Agency | **Toronto, Ontario**
Senior Software Engineering Consultant | **03/2023 - 10/2023**
- Providing Software Engineering Consultant services across many stacks. Notable clients include Medisca, IKO Global.

Bitbuy | www.bitbuy.ca | Crypto Exchange | **Toronto, Ontario**
Software Developer, Treasury & Risk | **06/2022 - 12/2022**
- Worked directly with the Finance team to develop an internal daily reconciliation tool. This helped transition the company from a monthly reconciliation process to a daily one saving the team countless hours reconciling. Transactions, trades, balances, and FX conversions needed to be pulled from internal and third-party APIs and accurately reconciled into a variety of reports.

Mobile Engineer | **01/2022 - 06/2022**
- Implemented EAS (Expo Application Services) into the mobile build process. Documented entire process to help other engineering teams across the business migrate to EAS.
- Reduced Web build time by ~25% (8 minutes).
- Increased both Web & Mobile releases to a minimum of 1 release per week by creating and modifying a variety of Github workflows, which included Slack notifications, to improve CI/CD pipeline.

Loopio Inc. | www.loopio.com | RFP Management Software | **Toronto, Ontario**
Full Stack Software Developer | **06/2021 - 12/2021**
- Refactored Loopio build process to allow support for Typescript. Introduced Typescript to the engineering team through a Lunch & Learn presentation.
- Developed a new PDF import system for Loopio's Project Import feature.

Full Stack Software Developer (Intern) | **05/2018 - 08/2019**
- Developed a Chrome Extension to assist with importing content into the customer library from anywhere on the web. Installations surpassed competitor solution within 5 days of being on the Chrome Store.
- Implemented integrations with Slack & Microsoft Dynamics.
- Gained extensive End to End, Integration & Unit testing experience. 100% code coverage required on all newly created features. Active member on Loopio's internal Testing Guild where we developed testing standards for the Engineering Team.
- Developed a bulk user import solution for large enterprise customers.
- Utilized: JavaScript, React, Redux, HTML/CSS, PHP, MySQL, Git
